Tezla LED CCT Downlights

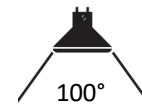

The Tezla Recessed LED downlight is a super fitting which comes with CCT options and dimmable as standard, meaning you can supply the fitting and the customer can decide on site what CCT to use and if they want them dimmable—or they can change them in the future if required. These fittings are ideal for both domestic and commercial use, are F rated for use on normal flammable ceilings, are low glare and flicker free. With a high lumen output of up to 120lm/W and the option to dim them, they are ideal for any installation

Recessed CCT Dimmable LED Downlights

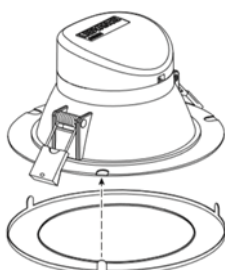

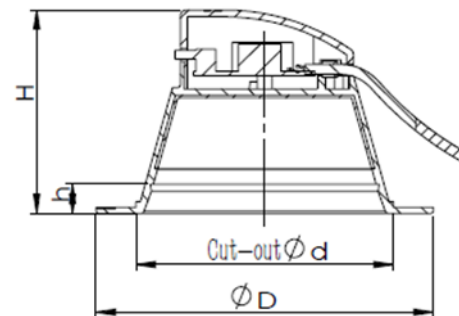

- Prewired for easy install and loop in loop out
- CCT switch—3000/4000/5000K
- Dimmable
- F Rated
- Low Glare & Even Light
- 100% Flicker Free
- UV and IR Free
- 3 Year Warranty
- 220—265V
- CE & RoHS certified
